Rely⁺On™ Virkon™ highly effective against Human Coronavirus

As you are aware, Human Coronavirus continues its rapid spread across Europe, China and Southeast Asia, with suspected cases in the UK and Canada. Many authorities have announced screening measures for passengers from China, including the major airport hubs of Dubai and Abu Dhabi.

With no vaccine or other medical treatment currently approved, we are pleased to advise that Rely⁺On™ Virkon™ has already received independent evaluation against the virus.

Rely⁺On™ Virkon™ met the performance requirements specified in the study protocol. The results indicate complete inactivation of Human Coronavirus under these test conditions, as required by the U.S. EPA. Tests were carried and confirmed by independent company ATS labs in 2015.

Rely⁺On™ Virkon™ achieved complete inactivation of the Human Coronavirus at a 1:100 dilution rate with a 10 minute contact time.

These test results provide independently proven data on the ability of Rely⁺On™ Virkon™ to effectively and completely kill the Human Coronavirus rapidly.

Yours sincerely

Anneliese Bischof
Business Director Disinfection
